

# Annex B. Place based finance: system diagram

This diagram illustrates the various different place based spending blocks, the suggested nature of governance (co-commissioning, devolution, pooling etc) and how much they would be worth in AnyPlace (in 2013/14 terms). Overlaps of boxes indicate conceptual overlaps of blocks, where outcomes or funding streams might be shared. It is important to note these as opportunities for closer integration – there is a risk of a different sort of silo mentality if this is not appreciated. The blocks to the right relate to growth and infrastructure, the blocks on the left – to services. The welfare system, while not a block itself, is viewed as an interface between the two aspects.
