

## Annex C. Place based finance: spectrum chart

This chart illustrates the different nature of arrangements that place based finance blocks could be governed under. There are many approaches, ranging from full central control (to the left of the spectrum) to full local control (to the right of the spectrum), that governance could fall under depending on local circumstances and theoretical concerns – please see the slide pack for more information. The suggestions here represent what the LGA believes to be an ‘ambitious’ approach – but the exact mix, and types of blocks, will ultimately depend on local preferences and negotiations. There is no ideal one-size-fits-all solution.
