

Firelink Update

Ray Gray
Delivery Manager

:: New Dimension ::

WHAT will it look like? - System Architecture

Where are we now?

Phase A:

- Installations into legacy control rooms complete in England
- Testing successfully completed in vehicles

Where are we now?

Phase B:

- 11 FRS now using Firelink in England
- 11 more in progress
- Feedback from Users good

Where are we now?

Phase C:

- Planning and Preparation Underway to rollout mobile data terminals in vehicles
- Firelink RCC interface equipment is now built
- Proof of Concept (POC) testing successfully completed
- 3 already installed in SW, EM and NE

What are the Challenges?

- Complete upgrade of base stations for extra resilience
- Maintain momentum with learning lessons and motivating FRS cooperation
- Continue station level team working
- Early fit out of MDT for FRS without current data
- Close working partnerships with Airwave and FiReControl
